NEW IL12 LIGHTING STRIP

PRESS RELEASE – FEBRUARY 2021

A BRAND OF

Dazzling effects with the IL12

NOËL & MARQUET has added a new lighting strip to its range of products: the IL12 WALLSTYL®. This new strip expands the options for creative lighting in interior spaces. It can be used anywhere, meaning that it offers maximum flexibility and is the perfect solution when you want to use light to create a particular atmosphere.

IL12

Thanks to a LED strip, the pared-down lines of the IL12 can be transformed into a magical light source. The integrated diffuser spreads the light evenly and helps to build a harmonious and cosy ambience. Whether you fit it to the wall, the ceiling or the skirting board, this lighting strip will create an appealing interplay of light and shade which will lift any room, and it can also be flush mounted to your wall or ceiling.

One of the main features which make the IL12 stand out from other lighting strips is that it can be directed both upwards and downwards and into the room. Fitted with a strip light, it can illuminate the ceiling, or focus into the room, meaning that it can be used for both direct and indirect lighting purposes. Its sleek and timeless design helps it blend seamlessly into any style of interior, casting your decorating style, whether classic or contemporary, in a whole new light. As a light source, the IL12 strip delivers inspiration for dazzling interior designs.

FITTED WITH LIGHTS

Fitted with LED strips, the IL12 WALLSTYL® lighting strip can serve to divide spaces or bring them together. It can create or accentuate different atmospheres, or be added freely to lines and shapes to make your interior feel even more like home. Depending on where it is placed, it will generate unique light and shade effects, setting off any space, whether domestic or commercial, to its very best advantage.

A VERSATILE LIGHTING SOLUTION FOR INTERIOR DECORATING SCHEMES

The product is supplied complete with a diffuser mounting, to spread the light attractively. No LED strip is supplied, so that the light can be deployed in a versatile way to your own personal liking: warm or cool light, coloured highlights or LED strips with special effects give your own ideas and creativity free rein when decorating your rooms. The IL12 lighting strip from NOËL & MARQUET offers yet another wonderful lighting solution with spectacular applications for architects, designers and lovers of interior decoration.

You can find the full range of WALLSTYL® lighting strips in our new product catalogue or on our website at www.noel-marquet.com
