

NOËL & MARQUET

DESIGN ELEMENTS

PUZZLE DESIGN ELEMENT
NEW MODEL ADDED
TO THE WALL TILES COLLECTION

PRESS RELEASE – FEBRUARY 2021

A BRAND OF

ELEGANT 3D WALL DECOR WITH PUZZLE

Give your rooms that personal touch thanks to NOËL & MARQUET's popular design elements, which can be used either to give a whole wall a facelift, or just to draw the eye to individual areas on walls or ceilings. PUZZLE is no exception, and has been designed by Kamelia Terzieva.

PUZZLE

The individual PUZZLE units measure 380 x 380 x 31 mm (H x W x D) and can be expanded with any number of elements. For instance, you can achieve individual highlights, or to add interest to the structure of whole walls. Every element can be turned through 360°, giving four different looks, which you can use to add attractive visual depth to your rooms thanks to the three-dimensional structure. Depending on how the elements are applied, the interplay of light and shade will give constantly new, but constantly extraordinary optical effects.

The WALL TILES can be used to achieve discreet focal points which radiate calm and order, or strikingly inspirational highlights, while the WALL PANELS deliver really fantastic full-wall coverage and create fascinating structures. Both collections support an abstract style, whose uncluttered lines and geometric shapes create accents which mean it will integrate seamlessly into any contemporary interior design scheme.

DESIGNED BY BULGARIAN INTERIOR DESIGNER KAMELIA TERZIEVA

PUZZLE is the brainchild of Bulgarian interior designer Kamelia Terzieva. Her refined product designs draw on years of experience as an architect and interior decorator. Her main interest is in the elegance of pure shapes and the associated wide range of possible variations. We have now harnessed this passion for mural decoration to expand and enhance our range and our collection of wall elements.

NOËL & MARQUET'S DESIGN ELEMENTS

The high-quality, precisely engineered WALL TILES from NOËL & MARQUET are suitable for both domestic and commercial spaces. They are made from high-density polyurethane foam, a precise and stable material, and owe their success to their light weight and durability. Every element is primed in matt white, and can be given a final coat in any colour. This versatile range of options means that there are no limits on how these three-dimensional wall elements can be applied. Fitting is easy and quick. The ideal adhesive is ADEFIX® PLUS from NOËL & MARQUET. Simply spread it on the reverse side of the individual elements and apply direct to your wall.

When you use NOËL & MARQUET's three-dimensional design elements to decorate your walls, you truly can give free rein to your creativity! You can find technical information, examples of applications, and an overview of the whole collection, at www.noel-marquet.com
